Set in a country cottage in a mining town in England in the late 1960's, The Band Waggon is a drama full of love, lies and betrayal.

A child has fallen into a well and is trapped. Things aren't looking good. But the drama isn't in the well – it swirls above it as all those impacted are caught up in the drama, notoriety and attention that the accident attracts. Who can be trusted and who is strong enough to do what's best for others rather than themselves?

Their ghosts are watching as prospective new tenants look through the flat where they lived.

Jill and Ian have come to view the flat. Will they be haunted or happy living here?
